

TOPPER

High cost performance
Integrated packaging & dispensing

The keg packaging container is as simple as bottled beer, featuring a built-in tapfor an instant

The barrel is made with high-barrier active materials that effectively block external air and UV rays, ensuring long-lasting freshness even after filling without opening.

Working principle:
Assemble the spout and connect it to the keg, turn the spout knob or pull the spout lever, air enters the keg and beer can be poured under the gravity.

Compact integrated structural, The 3L size is compact and portable, suitable for various consumption environments.

Applicable to various sales channels

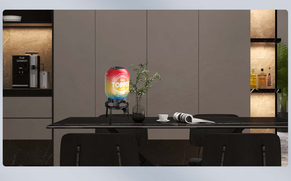

Comes with the dispensing device and stand, only the keg needs to be refrigerated before drinking

Heightened stand for 85mm glass

Applicable to various consumption places

Simple three-step operation

STEP 1
Turn clockwise to connect the spout

STEP 2
Insert the stand

STEP 3
Upside down to pour

Easy assembly of accessories
